

BELEN JESUIT PREPARATORY SCHOOL

Educating young men since 1854 in the tradition of St. Ignatius of Loyola

Athletic Director

March 7, 2013.

To: Whom it may concern.
From: Carlos Barquin, AD
Summer Camp Director

CSR Heavy Construction Inc. was involved in our retro fit turf project this past summer (June 2012 to August 2012). The scope of the project which was done in conjunction with A-Turf was as follows. CSR handled all of the earth work and retrofitting. Remove layers of fill, grade sub base, import proper kind of fill, laser grade, compaction, retro fitting existing drain system around the track, protect the track during construction, install drain grit under the playing surface, attach drain grit to the existing drain field system via pipes, built concrete curving and install wood nailer to the perimeter of the field. The project ran a couple of weeks long due to inclement weather.

CSR completed this project without any setbacks. CSR employees were extremely professional, understanding, considerate, responsible, reliable and extremely accessible. Their President Mr. Arcella is a gentleman who stuck to his words and backed them up with actions.

A-Turf was also outstanding and we have been extremely happy so far with the results, after a considerable amount of research on the turf we came away knowing that we had the best product currently on the market with the best warranty and at the best price.

Our original track was built by Fisher tracks, which is family owned. We went with the poly mat 5,000 and the red structure spray, two coats of the red structure spray were applied and then the striping was done. Our track is in its 8th year, due to South Florida Weather we went with a permeable surface and it has held together for all of this time.

If you have any questions or would like to speak with me about anything. Please do not hesitate in contacting me.

Once again I recommend CSR to you without any reservation.

My cell phone number is 305 298 7829.

Sincerely,

Carlos Barquin
