To Whom It May Concern:

During the past ten years, Paul Arcella, President of CSR Heavy Construction, Inc., has completed a wide variety of construction projects for CMSI Construction & Development. Peninsula Executive Center in Royal Palm Beach, Blount Industrial Center in Pompano Beach, High Ridge Commerce Park in Boynton Beach and Newport Center in Deerfield Beach, to name a few. I have been impressed not only by the quality of their work, but also by the flexibility, dependability and follow through.

No matter how large or small the project, Paul Arcella and CSR consistently completes each one within our time and budget constraints. Displaying excellent interpersonal communication and project management skills, Mr. Arcella closely coordinates our construction projects with his staff and our facility representatives to ensure the final outcome. At times, this means being creative as well as flexible to meet our high-quality standards.

But most appreciated is CSR's dependability and follow through. It is always a pleasure to work with a professional team that shows up ready to work at the scheduled time. They follow up on each project to make sure it is completed to our total satisfaction. If there are any problems, I can always count on them to remedy the situation immediately.

For all the above reasons, I highly recommend Mr. Arcella and CSR for any construction project they wish to undertake.

Sincerely,
