Memorandum

Subject: Letter of Appreciation

Date: 1/28/2009

From: Jose A. Rodriguez, FLL SSC Coordinator

To: **Dan Powell, CSR Heavy Construction**

Hi Dan,

I like to take this opportunity to thank you and your team on your efforts protecting our FAA Control Cable during your Construction Phase on the (North side Jet Center) project.

During this phase the scope included digging up an operational cable, installing split duct and encasing it via a new installed man-hole.

The 100 pair cable supported (ILS) Instrument Landing Systems on the Main Runway and Communications for the FLL Air Traffic Controllers.

Your constant coordination and communication with the FAA made it possible to complete the task with no impact to the (NAS) National Airspace System.

Your expertise, professional demeanor and can do attitude are to be commended.

Thank you, for a job well done!

Jose A. Rodriguez

FLL SSC Coordinator
